

Kaflox Portal Current Issues

1. Missing Document Upload Tab in Project Management Modal:

The current "Manage" modal for a project (first screenshot) only has tabs for Overview, Stages, Media, and Agents. There is no tab available for administrators to upload project-specific documents (such as contracts, architectural drawings, or sign-off sheets). A dedicated "Documents" tab needs to be added to this modal to allow Superadmins to upload files. Once uploaded, these documents should automatically appear and be accessible for download by the client in their Document Vault (second screenshot).
